RANGE FIRES

Range Fires become a problem in dry weather and may endanger plantations, buildings and standing crops if there are strong winds, and can cause excessive smoke. On Salisbury Plain the MoD put in a vast amount of fail safes to ensure surrounding communities are safe and do not endure too much nuisance as a result of the military training that is conducted throughout the year. In order to prevent and control range fires occurring the following measures are in force:

- 5 day weather forecast in order to mitigate the future effects of the prevailing weather.
- A grazing programme agreed with local farmers in order to keep the grass short during the summer months.
- Control of firing incendiary ammunitions during extreme dry conditions.
- A fire watch scheme in order to ensure fires are constantly monitored.

Salisbury Plain Training Area Headquarters strives to meet the military needs for realistic training whilst at the same time endeavouring to take into full account public concerns. We will continue to do so.
